

## How to Install the Training System

The RMS training system is a “complete RMS” in a single package which you can install on a Windows 7 or Windows 10 p.c.

- **Download** (or copy “RaceSystemInstaller.exe” from USB) to your desktop
- **Double click** to run it.
  - Windows /Firewall warnings? **click “Allow” or “OK” etc**
- Once installed, there should be a shortcut icon
  - “BSCRaceSystem” In your windows Start menu and also optionally on your desktop
- the app can be completely removed from your p.c either
  - Settings/Apps... “Uninstall a Program”
  - or goto C:\BSCRaceSystem and run unins000.exe
  - then delete any remaining files and folders

## How to use it...

- Click the “BSCRaceSystem” shortcut on the desktop to start the Training System:
  - NOTE: The training controller should stay open all the time...
  - It will likely be hidden behind other RMS windows when they start, that is fine!
- Click “Start Up Race Training System” button

## What should happen next?

- The 3 components of the system should start in sequence
  - First the database – the progress bar should go green
  - Then the SignOn Manager
  - Finally the PRO Race Controller
  - *NOTE: You will get a Windows warning click “Allow Access” (first time only)*
- **Ready to go!**

## Using the Training System

- To switch between the PRO and SignOn use ALT+TAB keys
- If there are any races scheduled for “today” they will be automatically loaded into the PRO.
- Otherwise there will be NO races showing!
  - click the “**Setup**” button
    - (top left on the PRO main screen)
  - Choose a racing date using the calendar,
    - Scheduled races for that date will be shown
  - **Click OK**

## Closing the Training System

- Close the PRO Controller, as you would on the “real” system
  - This will also close the SignOn Manager
- You will then see the “Training Controller” again:
- Click “Stop Database”
- Finally click “Shut Down”
